

## **Saskatoon Leading the Nation**

THURSDAY, 13 SEPTEMBER 2007

The hottest economies in Canada are in the west, and the centre of the flame is Saskatoon.

The Conference Board of Canada's, Metropolitan Outlook report says the Bridge City will topple Calgary as the fastest growing Census Metropolitan Area economy of 2007. We can thank the province-wide influx of people into Saskatchewan who are attracted by the lower cost of living and our strong economy. That, in turn, is driving Saskatoon's housing sector. The report targets Saskatoon's real GDP growth this year at 4.7%. [gw sept 13 2007]
